Notes provided by my niece, Susan Kaplan, based on her husband's conversation with Baxter

Luncheon - Dec 2, 1977

Buff Seminar sponsored by J & J in Princeton

Chas. Baxter, M.D.

Larry initiated discussion by asking Dr. Baxter if he had been at Parkland Hospital at the time of the Kennedy assassination.

Yes he had been on the team.

C & A burst through doors with guns telling everyone not to move.

2 bullet wounds in Kennedy:

— the one in neck clean as a whistle - hit virtually nothing and exited.

— the other bullet blew the back of Kennedy's head off and although he was alive for about 30 minutes after arrival the doctors decided not to open chest for heart massage because he was a vegetable.

1 bullet hit Connally

— he was raising his arm to turning around after hearing 1st shot and was shot himself through shoulder, wrist, lung & thigh — all with one bullet. He was very badly

injured and is left without a major portion of one lung.

One bullet was found on a stretcher.

Dr Baxter feels that bullets could be fired as quickly as the Farms Report claims. He himself belongs to a gun club.
